2020 „Vom Vulkan“

Riesling Schlossböckelheim VDP.ORTSWEIN

Gut Hermannsberg 's "Vom Vulkan" (engl: "from the volcano") is a multi-layered wine with an expressive origin. The grapes for this "VDP. Ortswein" traditionally originate entirely from the "VDP.GROSSEN LAGE® Schlossböckelheimer Kupfergrube".

In the nose, smoky aromas such as flint and complex flavors of herbal spices appear. This wine is clear structured and juicy, with an exciting tension on the palate. Its interplay of aromas is deep and multi-layered and influenced by salty minerals and strong spiciness, which are so very special for the "Kupfergrube" (engl: "copper mine"). A powerful wine that presents a cool freshness and a long finish.

The Riesling "Vom Vulkan" tolerates roasted aromas – which is why we love it in combination with roasted or grilled meat.

Origin: Melaphyre, volcanic igneous rock, covered by carbon slate: it took countless hours to structure a vineyard out of the old copper mine and the rugged rocky terrain. The grapes belong on the south-facing terraces until they are perfectly ripe.
